## **FENG 120: Facility Safety and Accident Prevention**

**Credits:** 1

**Class Hours:** 1 lecture

**Semester Offered:** Fall, Spring

**Description:** This is an introductory course on facility maintenance safety, including the effect it has on productivity and employee morale. The course includes application of a safety program into basic accident prevention. Students will learn and evaluate various federal (Occupational Safety and Health Administration -- OSHA), state, and local laws governing safety. Topics include hazardous chemicals, fall protection, electrical safety, and drugs in the workplace.
