

MEDA 220 : Medical Assisting Preceptorship

Credits: 4

Class Hours: 12 lab

Prerequisites:

"C" or higher in MEDA 120 and MEDA 176.

Corequisite Courses: MEDA 123

Description:

This course will provide students with supervised clinical experience and the opportunity to integrate medical assisting skills into a real life setting. Clinical experiences will take place in medical offices with an assigned preceptor.

Semester Offered: Spring

Course Student Learning Outcomes (CSLOs):

1. Demonstrate the ability to think critically when providing clinical and administrative skills in a medical office.
2. Integrate ethical and legal behavior into clinical and administrative skills in a medical office.
3. Integrate effective communication into clinical and administrative skills in a medical office.
4. Integrate financial practices into clinical and administrative skills in a medical office.
5. Perform entry level medical assisting skills safely and effectively.
